FROM OUR CUSTOMERS.

I r i s.

"I never received a finer lot of Iris roots from anyone, and I now have more than four hundred varieties."

Frances Lawton,
Thornton, Rhode Island.

"I must comment on your plants. They are the largest and finest I have ever seen."

Wesley I. Coddington,
Martinsville, New Jersey.

"I sent you a trial order last year and your plants were fine — much larger than those of other growers."

Walter H. Kiessig,
Davenport, Ia.

"All the plants were very nice ones."

Edith Childs,
Chicago, Illinois.

"I certainly was pleased with my Iris last spring."

Edward E. Knox,
Cincinnati, Ohio.

"I would like to inform you how pleased I was with the Iris. I hardly expected to have more than a bloom or two this year, but to my surprise there were more than forty. They are perfectly beautiful colors. I wish to thank you for making this selection and to tell you how much I enjoy them."

Frank E. Robson, Attorney for Michigan Central Railway, Detroit.

"The shipment I received from you last year was by far the nicest stock of all that I purchased. Practically every plant bloomed despite the late planting."

Mary E. Thomas,
Wichita, Kans.

P e o n i e s.

"The peonies were splendid and arrived in perfect condition. The roots were large and the buds big and fat. There may be some flowers next year."

E. O. Essig,
Berkeley, California.

"Peonies are O. K. and came thru in fine shape."

C. F. Wassenberg,
Van Wert, Ohio.

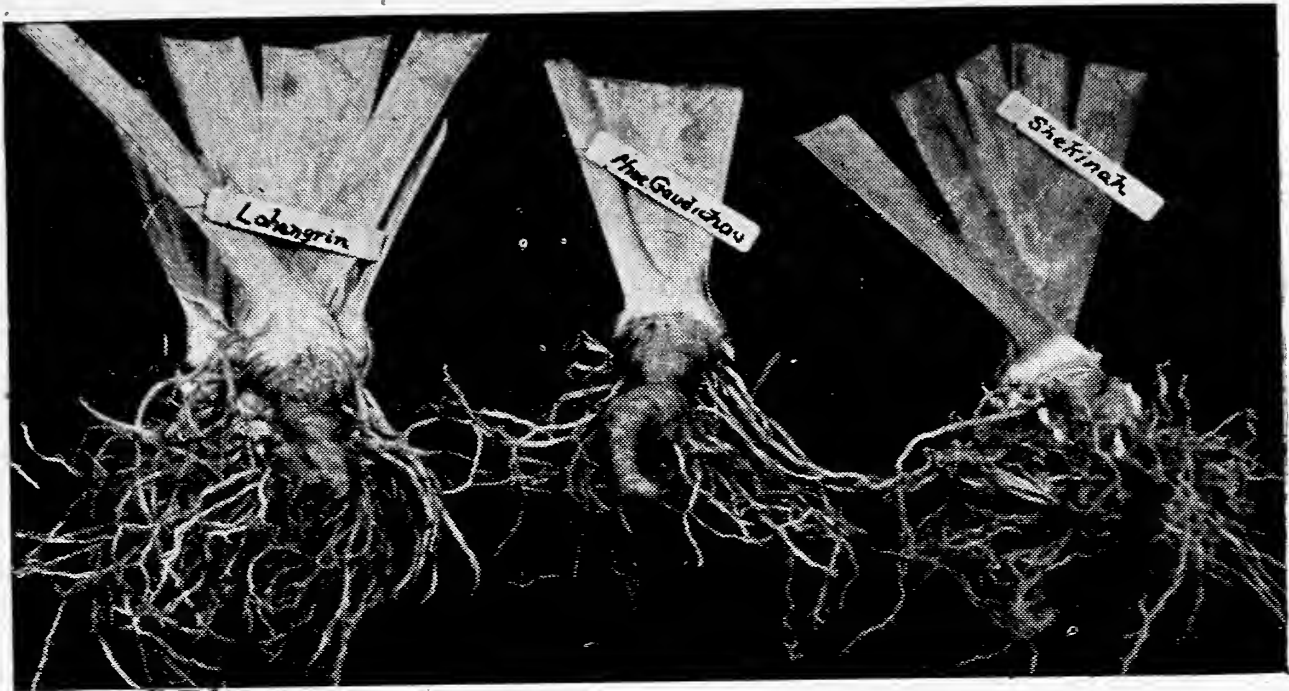

"My recent order of peonies came through in fine shape and were entirely satisfactory in every respect."

Mrs. M. A. Buchan,
Palo Alto, California.

"The peony roots sent me were certainly fine and I expect to have some good blooms from them."

B. G. Huse,
Lorain, Ohio.

I R I S

OREGON GROWN PLANTS.

INFORMATION REGARDING IRIS.

No orders filled for less than one dollar. Cash with order.

With such a large list of varieties, we give but short descriptions. The letter S. refers to the standards or upright petals and the letter F. refers to the falls or horizontal petals.

We prepay postage on retail orders and ship without delay.

Do not plant the iris too deep; rhizome should show above ground.

We have a large trade built on a reputation for furnishing fine, large rhizomes that bloom the first year. Anyone receiving a plant with which they are not fully satisfied, will receive their money back upon returning the rhizome.

If you have never given us a trial order, we trust that you will do so this year in order to know the quality of our rhizomes. Compare our prices and compare our plants; we know you will be satisfied.

We catalog but a few varieties receiving a garden rating below 80; the exception is we consider should rate much higher. Any grower who does not publish the rating, in our opinion, is simply ashamed to have it known as to what a lot of "junk" he grows.

INTRODUCTION.

Weed's Gardens have been established as a nursery since 1910, when specialization in peonies had its beginning. Specialization in iris began in 1914, at which time the leading varieties then in existence were obtained. Later introductions were added from year to year, until now we possess one of the best selections in the country. Our trade in iris and peonies has so increased from year to year that two years ago we decided to retire from the general nursery trade in order to devote full time to iris and peonies. With this change has come the new name of "Weed's Gardens", an old concern under a new name.

We are located on the Canyon Road six miles west from Portland, and one mile east from Beaverton. This road has been regraded and is the main highway to the coast. Visitors are welcome at all times, for even during the winter months we can show bloom of the delightful *Angustifolia*, our winter bloomer. By the time this variety is through blooming in April, the early dwarfs are showing, followed by the intermediates. These are followed by the tall bearded varieties and finally the delightful Japanese.

Our peonies make a grand showing of bloom during the month of June, at which time we conduct a peony show in the basement of our new residence. Visitors are invited at any time, but specially urged to visit us during May and June. Orders are then booked for delivery at the proper planting time.

We also furnish Decoration Day flowers at about one-fourth the price asked for them at the down-town stores. If the season is early, we have thousands of peony blooms for such purpose, while if the season is late, we have the iris blooms. An added advantage is that our flowers are fresh—picked while you wait.

During the blooming season, we furnish flowers for weddings, entertainments, and other social affairs where decorations are required.

We will be pleased to send a copy of this catalog to any of your friends upon request.

WEED'S GARDENS,
Beaverton, Oregon.

I R I S

TALL BEARDED IRIS.

These are the iris most generally known and by far the most popular. From May 15 to June 10 they form a riot of color in an iris garden.

	AARESHORST. S. white, flushed carmine. F. deep plum violet.	5.00
	AEGIR. S. white, flushed carmine. F. bright carmine violet.	5.00
82	AFTERGLOW. Grayish-lavender. Very prolific in bloom.	.25
	ALABASTER. A very fine white flower.	.75

OUR INTRODUCTIONS OF 1930

This year we are introducing four Oregon seedlings of very exceptional merit. Three are out of the same seedpod — Titan on Mme. Gaudichau — but each is entirely different. These flowers have attracted marked attention for the last two years and we are now introducing them with the greatest of confidence. The price may be considered high by some, but the plants are well worth all that is asked and more. We describe them in their order of merit.

OREGON BEAUTY, Kleinsorge, 1930. A very large flower, seven inches across, the falls 2 by 4 inches. S. aconite violet; F. bright velvety cotinga purple, with strong medial line and edge brighter. Beard strongly yellow. Style branches a beautiful crome yellow except for a medial line of violet. Haft beautifully marked brown. Height 38 inches, the flowers being borne on strong stiff stems. 50.00

OREGON GIANT, Kleinsorge, 1930. An immense bloom. S. 3½ inches long, reddish purple. F. 2 by 5 inches, widely flaring, blackish purple, very velvety. Veins at haft and style arm, deep purple. Heavy gold beard, six flowers to a stalk. Height 42 inches. 50.00

KLAMATH, Kleinsorge, 1929. S. hiscop violet, F. prune purple. Style branches chalcedony yellow on sides, crest purple drab. Beard extremely yellow. Haft and claw beautifully marked with brown. Height 42 inches. 50.00

HIGH TIDE, Barber, 1930. Caterina on Asia. Entire flower soft dark lavender, of Asia type but much better and larger. S. blue lavender. F. darker and flaring. Base of F. light colored with a yellow edge. Height 42 inches. 10.00

This variety is a very handsome flower, originated by the man who has produced the most beautiful Delphiniums in the world known as Hood-acres Delphiniums and grown at Troutdale, Oregon.

We will furnish one each of the four seedlings described above for \$135.00

NEWTONIA, Donahue, 1929. Amber colored pastel self. of fine form and substance. A frosty iridescence and golden beard illuminates the entire flower. This variety has the same growing qualities as Mme. Cheri, one of its parents. It is four feet tall and well branched. We are glad to be one of the two growers who have been selected to introduce this fine flower this year. 50.00

A MONEY BACK GUARANTEE

These five plants are as fine as any Irises ever produced. If obtained now they will make a rapid increase and can be sold at a good profit in the years to come. Any person who is dissatisfied with one of these four varieties, may return the plants at our expense after the first year blooming and we will refund the money paid with no questions asked. In this way, the purchaser will be enabled to see the true value of these flowers with no risk to himself. This offer does not apply to parties living within a hundred miles of our gardens as they are expected to visit our fields in person.

JAPANESE IRIS.

These remarkable iris are now coming into great popularity as their merits are becoming better known. They bloom after the bearded iris and continue blooming for fully six weeks. They have three, six, or nine petals known respectively as single, double, and very double in our descriptions.

Japanese iris require an acid soil to give the best bloom although they will bloom in any soil. The proper acidity is obtained by applying a small amount of sulphate of ammonia to the soil in which they are planted—a handful to each plant, applied once a year. Sheep guano is the best fertilizer but use no lime. These iris grow in practically every state, even in Minnesota. In a few places where they have not succeeded, their failure may be attributed to them being planted too late in autumn and thus being heaved out by the frost. Plant either in September-October or March-April. When they are ordered with bearded iris, we hold this part of the order until the proper time for planting. While they give larger flowers if well watered, the roots should not stand in water during the winter.

It is to be regretted that most dealers sell “mixed” varieties, this term being used to designate seedlings of unknown value — not one per cent of which are worth planting. We have been perfecting our list of varieties for a number of years and have what we believe to be the best collection of named varieties in this country, if not in the world. We contributed nearly a hundred varieties to the Brooklyn Botanical Garden some years ago. Many of these varieties have been returned to us with the names which the Garden recognizes. We desire to have our Japanese Iris as correctly named as our other varieties. When other dealers are as particular, this class will become as popular as the bearded Iris now are.

SINGLE.

AYASI. White center with wide crimson edge. Best seller.	.50
DOMINATOR. Handsome. Grey ground overlaid with blue.	1.00
FRANCES E. CLEVELAND. Gigantic blue lavender. Best Japanese.	2.00
HOTARI. Light lavender, veined purple.	.75

SWORD DANCE. Very large flower of reddish maroon.	2.00
TOSEN. Light mauve, pencilled and tipped violet.	1.00
TSURIGI. Large, pure white of firm substance.	.50

W E E D ' S G A R D E N S

WAKAMA. Bright crimson purple, splashed white.	1.50
WAKAMURA. Crimson violet. White halo, surrounding yellow bar	2.00
YONOMO. Grey ground overlaid with crimson-maroon.	1.00
ZUTSU. Very double. Violet-blue	1.00

These Iris are fine for planting around lily pools or in special Japanese gardens. They make an attractive showing, however, in any garden and bloom at a time when the majority of other flowers have passed. We will furnish the set of 61 varieties for forty dollars.

MISCELLANEOUS IRIS.

CACIQUE. A unique flower, being a Fulva hybrid. Prune purple.	1.00
DOROTHEA WILLIAMSON. An American hybrid of a royal purple. Entirely different from others and fine for table bouquets.	.50
PSEUDACORUS. Known as the "Yellow Water Iris."	.25
PSEUDACORUS GIGANTEA. An improved form of the above.	.35

PALESTINE IRIS.

These Iris are hardy and the flowers fine. They bloom two weeks before the tall bearded varieties. They must not be watered during the summer and should be planted only in the early fall. Picture on back of catalog is of a Palestine bloom.

BUCHARICA. A fine early yellow.	.50
CHARON. Golden-brown chocolate.	1.50
HAMADAN. S. light violet; F. purple-violet, black beard.	1.50
HOOGIANA. A very beautiful tall lavender blue.	2.00
IPFALL. Deep red-violet.	1.50
KOROLKOWI. Lilac, veined purple. Very beautiful.	1.00
ZWANENBURG. S. cream, blotched greenish bluff. F. chamois to olive brown. Vigorous flower and very early. Classed among the best fifty iris and is very easy to grow.	.25

In order to give all an opportunity of having these beautiful flowers which bloom so much earlier than others, we will furnish one each of the above for five dollars. Include them in your order for other irises and we will send in September.

I R I S

ANGUSTIFOLIA. This is our Winter bloomer and is a delightful flower of a light lavender color. The plants have grass-like foliage and bloom from the first of December until April, depending upon weather conditions. It is not hardy in the Eastern states, except in the South.

1.00

IRIS SIBERICA.

The iris of this group have tall stems and grasslike foliage. The flowers come in various shades of blue, with white markings. They make good cut flowers and the plants do well in wet ground, but are easily grown in any soil.

BLUE KING. Deep purplish blue. Very attractive.	.25
BUTTERFLY. Clear porcelin blue. Makes good cut flower.	.50
EMPEROR. A large, fine deep violet. 4 ft. Best Siberian.	.50
MRS. SANDERS. Very dark blue. Good in bouquets.	.50
PERRY'S BLUE. Handsome clear deep blue. of good quality.	.50
SANGUINEA. Intensely brilliant blue flowers.	.25
SNOW QUEEN. Pure glistening white with yellow throat.	.25
SUNNYBROOK. Large greyish blue.	.25
SUPERBA. Violet-blue. of good appearance	.25

IRIS SPURIA.

These Iris are generally mentioned as the Oriental iris, because of being native to various oriental countries. Many of the forms now in the trade, however, have been produced by crossing with various species. The plants are mostly five feet in height, the flowers borne on a tall stiff stem, well above the blade-like leaves. They do well in any soil, but will stand a wet soil in which the tall bearded iris will not grow. They can thus be massed to advantage on the border of pools or streams. They bloom in Oregon during June, much later than the bearded varieties.

AUREA. A wonderful yellow. of good size.	.50
DOROTHY FOSTER. S. soft violet; F. light blue. 4 ft.	.75
MONNIERI. Golden yellow flowers. on tall stalks.	.50
MONSPUR. Various shades of blue.	.50
MRS. TAIT. Soft porcelain blue. Good in mass.	.50
NOTHA. S. rich violet; F. blue, spotted yellow.	.50
OCHROLEUCA. White, with orange blotch on falls.	.25

SPECIAL BARGAINS IN PEONIES.

Realizing that many who desire a selection of peonies may not have the time or inclination to select the proper varieties from our gardens or displays, we give below several collections which are truly bargains. They have been selected so as to give the most value for the money.

Collection No. 1—Ten peonies, giving the best flowers for the price:

Officinalis rubra50	The Bride.....	2.00
Felix Crousse.....	1.00	Alexandriana	1.00
Festiva maxima50	Edulis superba40
Marie Lemoine50	Golden Harvest40
Floral Treasure40	La Rosiere40
			\$7.10

This collection will be furnished for \$5.00.

Collection No. 2—Ten peonies giving the best range of colors:

White, Festiva maxima.....	.50	White, Avalanche50
White, Marie Lemoine.....	.40	Multicolor, Glory of Sunset40
Pink, Edulis superba.....	.40	Pink, Reine Hortense.....	3.00
Pink, Crown on Crown.....	.50	Red, Officinalis rubra.....	.50
Red, Felix Crousse.....	1.00	Red, Rachel, T75
			\$8.05

This collection will be furnished for \$6.00

Collection No. 3—Ten peonies giving the longest season of bloom:

Very early red, officinalis rubra50	Early white Festiva maxima ..	.50
Early pink, Edulis superba40	Early red, Bertha40
Midseason white, La Rosiere40	Midseason pink, Crown on Crown ..	.40
Midseason red, Rachel, T.....	.75	Late white, Marie Lemoine..	.50
Late pink, Mlle. Leonie Calot50	Late red, Grover Cleveland	1.00
			\$5.35

This collection will be furnished for \$4.00.

COMPARE OUR PLANTS

PEONIES.

Our specialization in Peonies began in 1912 with the purchase of the largest collection then in the west and its removal to Beaverton. There are 374 varieties described in this catalog — far too many we admit and so we have made the prices extremely low in order to reduce the number of varieties during the coming year. If you will compare these prices with the prices of other dealers, you will realize just how low they are. Also bear in mind that we prepay postage and make prompt shipment after the middle of September, which is as early as a peony should be moved. We have shipped to all parts of the United States with satisfactory results.

Our peonies begin flowering in early May and continue during June. If you have never seen them in bloom, mere words cannot describe their beauty to you for they make a two acre bouquet of pink, white and red with all the various shades between. Last year we had 20,000 visitors and we trust that you will be one of that number to visit our gardens this year. We give a large well balanced root of 3 to 5' eyes, having been grown in rich clay soil. Anyone dissatisfied with plants they receive from us may have their money refunded with the return of unsatisfactory roots.

CULTURAL DIRECTIONS.

Plant in ordinary soil, first spading the ground well and then planting so that the eyes will be covered with two inches of dirt. Too deep planting results in blind shoots, while exposed eyes result in weak flowers. Plant in full sunlight, away from the roots of trees or shrubs.

Do not fertilize with barn yard manure or other fertilizer rich in nitrogen. Peonies need acid phosphate to produce flowers and potash in order to give strength to the stems. Bone meal is the ideal fertilizer for this purpose. Apply in the fall or early spring for the ingredients are not immediately available for plant food. Scatter the fertilizer around each plant — about a handful to a plant — before the working of the soil each year. The dirt around the plants should be kept well stirred in order to retain the soil moisture.

PEONIES AS CUT FLOWERS.

Peonies will last as cut flowers from a few hours to two weeks. When cut in the field after being fully open and especially when cut in the middle of the day, they last but two to three hours. But cut in bud early in the morning or late in the evening and then placed in water in a cool place, the blooms will last for several days. We keep the Reine Hortense variety two weeks in this way.

C O M P A R E O U R P R I C E S

OFFICINALIS RUBRA PLENA. This is the old fashioned early red. .50

SINGLE PEONIES.

The single varieties are becoming very popular as they become better known. They are more early in season and very attractive.

85	BLACK PRINCE.	Th. Dark garnet, not glossy.	3.00
73	CAMILLE.	Des. A purple flower of good appearance.	1.00
